
DRAGON

interior panelling with a structured painted surface

Dragon interior panelling boards feature a decorative relief surface inspired by Japanese-style wood-burning technology and add a fascinating effect to your interior. The patterned look of this material adds a personal touch to your interior finishing.

The Dragon boards have been created using modern embossing technology. The pattern is pressed on the wooden surface using a special press tool and covered with three layers of paint.

Teknos waterborne paints and varnishes with an acrylate binding agent are used for painting.

Tongue-and-groove panelling boards can be installed like parquet, i.e. effectively minimising losses due to different lengths.

- Species: spruce
- Covered area (useful): 1.96 m² (6 pcs) per package
- Surface treatment: Dragon pattern, painted
- Colour: black/semi-matte
- Profile: PTGH/OT, tongue-and-groove
- Dimensions: 19 × 146 mm
- Cover width: 136.5 mm
- Length: 2400 mm (net length: 2357 mm)
- Result: structured, smooth, painted
- Environmentally friendly material
- Package dimensions: 114 × 146 × 2400 mm
